

WHAT IS CLAIMED IS:

- 1 1. A circuit board assembly, comprising:
2 a first board on which electric wires are wired, the first board including
3 a first part having a first thickness and a second part continued from the first
4 part and having a second thickness smaller than the first thickness; and
5 a second board on which bus bars are arranged, the second board
6 disposed on the second part of the first board.

- 1 2. The circuit board assembly as set forth in claim 1, wherein:
2 the second part is defined by forming stepped portions in both main
3 faces of the first board; and
4 the second board is disposed on each of the stepped portion.

- 1 3. The circuit board assembly as set forth in claim 1, wherein the second
2 board has a third thickness which is determined such that an additional
3 thickness of the second thickness and the third thickness is not greater than
4 the first thickness.

- 1 4. The circuit board assembly as set forth in claim 1, wherein the second
2 board is formed with grooves for receiving the bus bars.

- 1 5. The circuit board assembly as set forth in claim 1, wherein the electric
2 wires and the bus bars are electrically connected.

1 6. The circuit board assembly as set forth in claim 2, wherein the second
2 board disposed on one of the stepped portion is fixed on another board on
3 which electric wires are wired.
